Ananya / CSR Partnership Radar — Components Map

Actor	Trigger	Input	Context	Processing	AI	Output
Ananya (Head of Partnerships)	**Clicks “Refresh intelligence”** any time, from the dashboard					**Reviews & decides** call · monitor · won — AI recommends, Ananya decides
Vercel Cron (weekly scheduler)	**Every Monday, 06:00 IST** scan + digest · a repeat run the same day is skipped					
Public sources (18 live feeds)		**Pulls 18 public feeds** CSR news · NGO partner calls · MCA rule updates → headline, text, date, link				
Radar memory (Context)			**Focus sectors · Pune + target regions · scoring weights** + past items & decisions in Neon			
Rules engine (scoring in code)				**Keyword filter · duplicate merge · 7-day IST window** only new, relevant items go on **Checks every quote against the source · 100-pt score** → Call this week / Watchlist / Policy / Context only		**Low relevance / expired calls** kept as context, never padded into the shortlist
Gemini Flash (read & summarise)					**Reads each article → strict JSON** sector · company · type · NGO-partner signal + exact quotes · never the score · writes the weekly brief	
Digest & dashboard (+ email via Resend)						**Ranked dashboard + Monday digest** emailed via Resend · printable

on demand · *decision saved — never overwritten by the next scan* · *Monday 06:00 email* · *weekly run* · *raw items* · *sectors · regions · weights* · *new items only* · *low / expired* · *facts + quotes* · *weekly brief* · *sector list for the prompt* · *ranked shortlist*

Trigger · Live data · Context · Rules in code · Gemini Flash (only AI) · Output · Human decision · Held back

Monday cron or Refresh → 18 public feeds → rules in code (filter, dedupe, 7-day window) → Gemini Flash (facts & quotes only) → score in code → digest + email → Ananya decides
