CSR Partnership Radar — Components Map (as implemented)

Next.js 16 on Vercel · Neon Postgres · Gemini Flash (gemini-3.8-flash)

1 · TRIGGER

Vercel Cron
Mon 00:30 UTC = 06:00 IST
GET /api/cron/weekly-digest
Bearer CRON_SECRET

Ananya: Refresh
POST /api/refresh
same-origin only · 2-min cooldown

Mac collector (launchd)
Mon 05:15 + daily 09:00 IST
sources that block Vercel IPs
scripts/collect-local.ts --prod

Ananya: Generate digest
POST /api/digest/generate
same-origin only · 20-s cooldown

2 · INPUT

CSR specialist RSS
India CSR ×4 · CSR Journal ×4
CSR Universe · CSR Mandate

Business & regulatory RSS
ET · Mint · TaxGuru (MCA)

Official corporate RSS
HCLTech newsroom

Partner-call feeds
NGOportal ×2 (Vercel)
NGOBox · FundsForNGOs (Mac)

News index API (via Mac)
GDELT DOC 2.0

Not fetched (recorded)
PIB · MCA · CSR portal: 403
Google News · BusinessLine: robots.txt

3 · CONTEXT

Source registry
data/sources.json → sources
enabled · limits · last error

start refresh run

enabled sources

RSS / HTML / JSON over HTTPS

Ananya's settings
sectors · geographies · weights
window · thresholds
(user_settings, validated)

also feeds Gemini prompt (sector keys)
config

Neon Postgres
announcements
announcement_sources
evidence_claims
opportunity_scores · reviews
digests · digest_items
fetch_runs · audit_events

store

persist analysis, claims, scores

npm run db:seed

Synthetic seed
31 labelled records
demo mode only

4 · PROCESSING (code)

1. Fetch adapters
rss.ts · gdelt.ts · 12s timeout
per-source failure isolation

2. Normalise & validate
HTML→text · canonical URL
publication-date provenance

3. Relevance pre-filter
sector keywords from settings
30-day lookback

4. Dedup layers 1–2
canonical URL · headline
similarity ±3 days

5. Excerpt verification
every "fact" must be quoted
verbatim from source text

6. Dedup layer 3 (merge)
same company · date ±4 days
· initiative / headline overlap

7. Window + scoring
7-day IST window · 100-pt score
priority · confidence

scored set

8. Digest builder
sections · no padding
idempotent key live:<IST date>

generate digest

5 · AI (Gemini Flash)

fetch / AI failures recorded

Gemini Flash
Classify & extract
structured JSON → zod check
bounded retries · timeouts
article = untrusted data

ranked opportunities

Gemini Flash
Digest overview
validated items only
fallback: code summary

6 · OUTPUT

Source health & errors
per-source last_error
fetch_runs · audit_events
shown on dashboard + digest

Ranked dashboard + detail
score breakdown · evidence
links · filters · live/demo

HUMAN DECISION GATE
AI recommends, Ananya decides
contact · monitor · research
not relevant · contacted
discussion · won/closed

Weekly digest
digests + digest_items
in-app · print / PDF · email

Email via Resend
once per digest (atomic claim)

decision + note stored (append-only; never overwritten by reprocessing)

Legend — data flow · configuration / context · error path · human decision · deterministic code · Gemini Flash (only AI) · human gate · not fetched (dashed) · synthetic demo data

Every box maps to code in github.com/AyushSarkar07/csr-partnership-radar (see docs/COMPONENTS_MAP.md for file paths). AI is used only in column 5; dates, dedup, filtering and scoring are deterministic code.
